Profile

I am currently a student at SAE in New York City studying audio engineering with a background in music and composition. My interest in music has led me to further involve myself in every element of the recording and production process and I am constantly building upon my knowledge and interest in the many aspects of music and sound.

Education

School of Audio Engineering New York, NY – Audio Technology Diploma, 2015

Skills

Pro Tools, Logic, mixing and editing, console experience, patching experience, music composition, microphone knowledge, years of customer service and hospitality in NYC, live stage performance experience at various venues in Brooklyn and NYC including The Living Room, Googie's Lounge, The Trash Bar, Pete's Candy Store, and Pine Box Rock Shop

Experience

Barista, Intelligentsia Coffee and Tea; New York, NY– 2014-Present

My experience at Intelligenstia has involved everything from dialing in single origin coffees via daily cuppings to latte art to customer assistance. Upholding the Direct Trade model was an important aspect of my involvement with coffee as well as providing customers with knowledge in a supportive way while reserving any condescension.

Barista, Depanneur; Brooklyn, NY– 2014

Depanneur provided the surrounding Williamsburg area with specialty food items, craft beer, an array of baked goods and delicious coffee. I was responsible for both opening and closing as well as cleaning the espresso machine and dialing in espresso before first sale. Baristas were also responsible for their own register which involved separating Seamless tips and counting down.

Barista, Pudge Knuckles; Brooklyn, NY – 2013-2014

As a barista at Pudge Knuckles, I played a strong managerial roll by keeping track of inventory, delegating tasks and driving a strong workflow during morning rushes. I also hosted a successful weekly open mic called 'UNHEARD OF!' which encouraged local clientele to participate and present their songs in a welcoming environment.
